

## EYE & FACE PROTECTION POLICY

---

**Purpose:** Personal Protective Equipment (PPE) including eye and face equipment is required where there is a reasonable probability of injury that can be prevented by such equipment as identified by the hazard analysis completed for each job description.

**Scope:** In such cases, the company must make conveniently available a type of protector suitable for the work to be performed, and employees must use such protectors. No unprotected person will knowingly be subjected to a hazardous environmental condition. Suitable eye protectors must be provided where machines or operations present the hazard of flying objects, glare, liquids, injurious radiation, or a combination of these hazards.

### Exceptions

Eye protection is required and must be worn in all locations in the building with the exception of the following: Office areas.

### Eye protection areas

Eye protection areas mean essentially all operating areas where the work being performed carries the potential for injury to the eye, especially when activities are occurring that involve:

- (a) Corrosive or other chemically hazardous materials.
- (b) Hot molten metals.
- (c) Heat treatment, tempering or heating of flammable, solvents, corrosives or any other material above its relative flash point or above ambient room temperature, whichever is lower.
- (d) Gas or electric arc welding.
- (e) Machine shop operations.
- (f) Any situation where an implosion hazard exists.

**THIS IS A 2-PAGE POLICY.**
